Our Vision & Goals

Innovation leads us to the optimal solution

In TESHFEAR, we take innovation and software engineering as a way to achieve a positive impact on society. We do not just work to provide technical solutions, but also build successful stories with our partners, and through our experience, ideas turn into codes and software, thus we raise standards at the national and international levels in the field of software engineering.

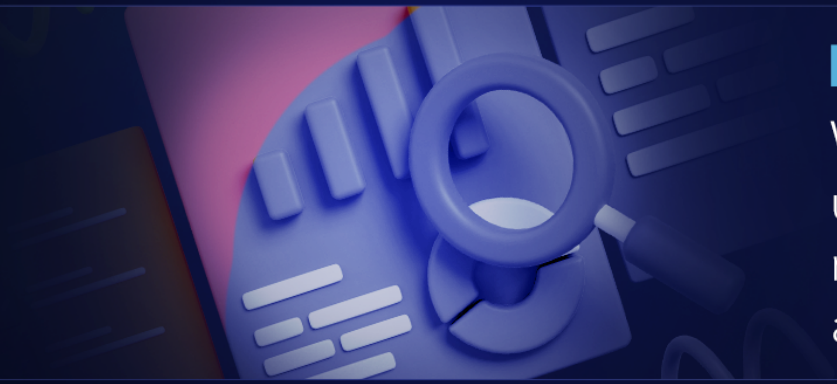
How we work?



Requirements analysis

We contact with clients to understand their needs and requirements, analyze opportunity, and determine the desired goals.

1

Project Design

2

We develop a clear perception of the proposed project and determine the required features and functions as well as preparing a high- level planning and design of the project

تشفير
teshfear

Software Development

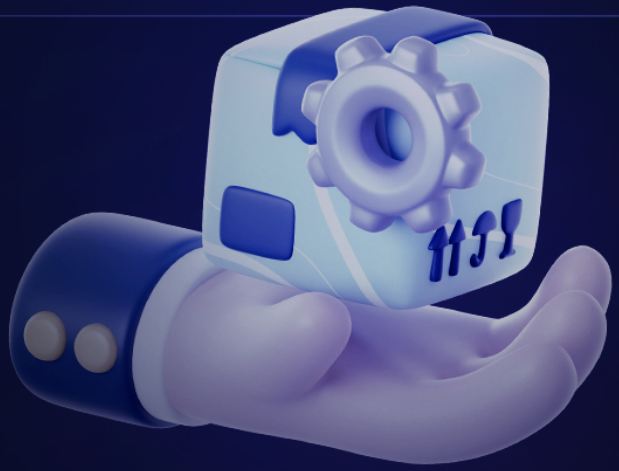
We build and develop software and technical products with best practices and modern development techniques

3

4

Deploy and Testing, QA

We test the project as it goes through multiple processes to ensure the performance and quality of the product. We also analyze the results to update solutions according to the requirements



Launching

This phase represents a starting point for the project, where the technical vision achieves and its readiness for launch is confirmed.

5

Training and Knowledge Transfer

6

We provide training and support for clients and final users, and transfer the knowledge related to the project to ensure the effective use.

تشفير
teshfear

Follow-up and Support

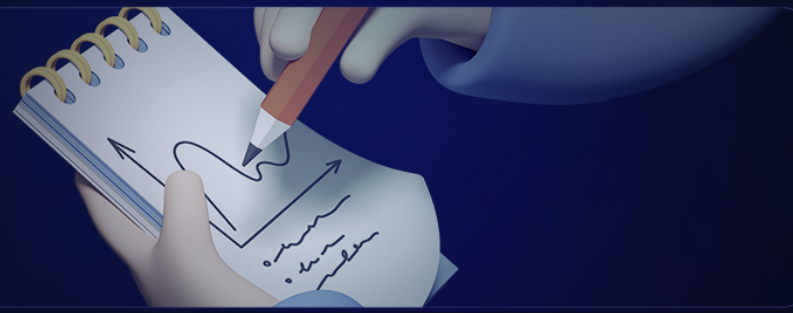
After launching the project, we provide ongoing support for clients, and follow up and improve the performance of software if needed

7

8

Evaluation and Analysis

In this phase, project performance and the achievements of goals are evaluated as well as learning from experiences and improving future operations



Continuous Development

We look for new opportunities for innovation, developing the project, keeping up with technical developments, and improving the solutions offered

9

Our Projects
